

Innovation management system · ISO 56001-aligned

Build the team that finds the next result, again and again.

A consultant can find a constraint once. The lasting value is your own people finding the next one, and the one after, with governance that decides what gets funded, reviewed and stopped. We set up that system with your leadership, aligned with ISO 56001, run its first cycles with your team, and hand it over.

WHAT WEIGHS ON LEADERS

Innovation money goes to the best pitch, not to strategy

Lots of activity, nothing that scales

Your people have stopped bringing ideas

The chairman wants ISO 56001 or the award, not paperwork

Innovation is the first budget cut

WHAT THE SYSTEM GIVES YOU

Innovation tied to corporate priorities

Leaders who know which decisions they own

A visible, managed portfolio

Evidence that shapes investment

Capability that stays in-house

HOW IT RUNS

Week 0

An hour with a founder

60 minutes

A first view of where the system breaks down, and a straight answer on fit.

Baseline

ISO 56001 Baseline Assessment

Your system against the standard

Portfolio, decisions and routines assessed clause by clause; plan and handover criteria agreed.

Then

The system, run with you

Establish · run together · transfer

We set it up, run the first cycles with your team, and step back as named owners take over.

The system covers leadership and direction, governance and decision rights, portfolio management, process and SOPs, team and capability, and measurement and learning.

HOW YOU WILL KNOW IT WORKS

- Named owners run governance and portfolio meetings
- Decisions are documented against agreed criteria
- Teams move initiatives through the agreed process
- Your team takes a new problem to a decision without us

ISO 56001 AND CERTIFICATION

We use the standard to make the system complete, not to make paperwork. Certification is optional and your decision; an independent certification body audits and decides conformity.

Our founding team includes an ISO 56001 Lead Auditor (certified by Amplify Innovation, Sweden) and National Innovation Award assessors appointed by NIA, so we know what both an auditor and an assessor look for.

What must innovation contribute to your business?

Bring it to an hour with Teerasak Wongpiya, Co-Founder and Managing Director.
